

SOUTHERN CALIFORNIA PUBLIC POWER AUTHORITY

Request for Proposals on Transportation Electrification Support

Re-Issuance Date: July 14, 2016

I. Introduction

The Southern California Public Power Authority (SCPPA), on behalf of its Member Utilities and other publicly-owned utilities (POUs), is hereby soliciting competitive proposals for assistance from qualified individuals, firms, agencies, and/or organizations in developing policies, programs and/or services to support their respective interests in the electrification of the transportation market.

SCPPA is interested in continuing to discover Respondent's capabilities and experience related to the specified Areas of Interest and associated pricing to enable informed decisions and potentially proceed to more specific negotiations on contract development with one or more qualified Respondents to this Request for Proposals (RFP). SCPPA has received many compelling and comprehensive responses to this same RFP during the first half of this year – and some of those are being considered and pursued by Members. However, as the market continues to expand SCPPA also intends to allow new entrants to provide additional offerings.

Based on this intention, the RFP will remain “open” and Responses will be accepted until a time that SCPPA, at its sole discretion, has acquired sufficient support services to meet the needs of Members and the communities that they serve. Respondents are encouraged to present submittals that will allow Members to match potentially qualified service offerings with their mutual and/or specific needs and Areas of Interest, as described below in Section III.

II. Background

SCPPA is a joint powers authority and a public entity organized under the California Joint Exercise of Power Act found in Chapter 5 of Division 7 of Title 1 of the Government Code of the State of California, and through the SCPPA Joint Powers Agreement, for the purposes of planning, financing, developing, acquiring, constructing, operating and maintaining projects for the generation or transmission of electric energy. SCPPA also facilitates joint service contracts, at the request of its members, to aggregate like project efforts among its Members for the purposes of developing energy efficiency, demand response and resource procurement Programs or Projects to improve operating efficiencies and reduce costs.

Membership of SCPPA consists of eleven cities and one irrigation district, which supply electric energy and water service within Southern California, including the municipal utilities of the cities of Anaheim, Azusa, Banning, Burbank, Cerritos, Colton, Glendale, Los Angeles, Pasadena, Riverside, and Vernon, and the Imperial Irrigation District. SCPPA is governed by its Board of Directors, which consists of representatives from each of its Members. The management of SCPPA is under the direction of an Executive Director who is appointed by the Board.

Any service contract subsequently entered into by SCPPA pursuant to this RFP would be utilized directly by the interested Members to serve their respective utility customers' needs. The service and work products would be ordered and approved directly by SCPPA and/or the applicable Members/utilities and the billing would be administered through SCPPA.

III. Areas of Interest
