

SOUTHERN CALIFORNIA PUBLIC POWER AUTHORITY

Request for Proposals for the Development and Implementation of a Direct Installation Program for Retail and Wholesale Food Sales/Grocery Stores

Issuance Date: August 17, 2016

Response Deadline: September 22, 2016

I. Introduction

The Southern California Public Power Authority (SCPPA), on behalf of its Member Utilities (Members), is hereby soliciting competitive proposals from qualified firms to develop and implement a Direct Installation Program specifically focused on retail and wholesale food sales facilities (“Grocery Stores”) that are customers of participating Members, as described below in Section III.

SCPPA is interested in discovering all Respondent’s capabilities related to specified Areas of Interest and associated pricing to enable informed decisions and potentially proceed to more specific negotiations on contract development with one or more qualified Respondents to this Request for Proposals (RFP).

Responses to this RFP are due on or before **4:00pm (PDT), September 22, 2016**, as described below in Sections III and V.

II. Background

SCPPA is a joint powers authority and a public entity organized under the California Joint Exercise of Power Act found in Chapter 5 of Division 7 of Title 1 of the Government Code of the State of California, and through the SCPPA Joint Powers Agreement, for the purposes of planning, financing, developing, acquiring, constructing, operating and maintaining projects for the generation or transmission of electric energy. SCPPA also facilitates joint service contracts, at the request of its members, to aggregate like project efforts among its Members for the purposes of developing energy efficiency, demand response and resource procurement Programs or Projects to improve operating efficiencies and reduce costs.

Membership of SCPPA consists of eleven cities and one irrigation district, which supply electric energy within Southern California, including the municipal utilities of the cities of Anaheim, Azusa, Banning, Burbank, Cerritos, Colton, Glendale, Los Angeles, Pasadena, Riverside, and Vernon, and the Imperial Irrigation District. SCPPA is governed by its Board of Directors, which consists of representatives from each of its Members. The management of SCPPA is under the direction of an Executive Director who is appointed by the Board.

Any service contract subsequently entered into by SCPPA pursuant to this RFP would be utilized directly by the interested Members to serve their respective utility customers’ needs. The service and work products

SCPPA Retail Food/Grocery Direct Installation Program RFP – August 17, 2016

would be ordered and approved directly by SCPPA and/or the participating Members and the billing would be administered through SCPPA.

III. Areas of Interest

Certain SCPPA Members, have expressed potential interest in securing the services of one or more qualified firms to develop and implement a flexible direct installation (DI) program that would provide participating Members with the tools and resources necessary to help reduce energy usage and peak demand in certain Grocery Stores including but not limited to: “big-box” facilities, large national chains, or local, “mom and pop stores who sell food supplies to the communities that the Members serve.

These Grocery Stores typically include equipment that consumes a significant amount of electrical energy, including refrigeration equipment as well as air conditioning equipment and lighting systems. Individually and together this equipment can also provide substantial opportunities for efficiency improvements including energy and cost savings for the both the utility and customers.

To achieve these savings, SCPPA is seeking qualified firms that can demonstrate their experience and capabilities in developing and implementing a DI program for Grocery Stores in the service territories of participating Members. Specifically, the DI program being considered will target the repair, retro-commissioning and/or possible replacement of the three (3) primary equipment types:

1. Commercial-scale refrigeration equipment;
2. Heating, Ventilation and Air Conditioning (HVAC) systems; and
3. Lighting Systems

Respondents must demonstrate their experience and ability to perform cost-effective DI services in all 3 of these Areas identified above. At a minimum, Respondents must also submit the following elements to demonstrate how they will be able to meet the goals of this Program.

1. Specify a range of the size of facilities that are proposed to be targeted in the DI program, using a scale of: “Small”, “Ideal” and “Large” size facilities.¹ This range could be based on or drawn from simple square footage of the building, size of refrigeration equipment, HVAC tonnage or other metric that may be useful in determining potential participation or applicability. The basis for the range(s) should be clearly identified in Responses.
2. Identify and specify the primary equipment types in each of the 3 Areas of Interest that will be targeted in the Program. (e.g. Strip curtains, ECMs, T8/T12 replacements, de-lamping, LEDs, RTU replacement, occupancy sensors ...)
3. Identify and specify the practices that will be used to determine the suitability and usefulness of repairing, retro-commissioning and/or replacing any of the equipment types identified in No. 2, above.
4. Develop and present estimates of the number of facilities in each SCPPA service territory that could be candidates to participate in the DI program, based on the criteria specified in Nos. 1-3, above.
 - a. This estimate of the number of facilities that could possibly “qualify” to participate in the Program will include a range of the potential energy (kWh and BTU) savings and peak load (kW) reduction that could be achieved by the Program.²

¹ If Respondent’s proposed DI Program equates the largest facilities to the “Ideal” size or scenario, then the size classifications should be made to equal “Small”, “Medium”, and “Ideal”

² The estimates in Nos. 4 and 4a, above, will be refined upon the selection of the successful Respondent(s) and determination by SCPPA Members of the respective levels of participation in the Program.

5. Outline practices and protocols to be used for:
 - a. Program participation (customer outreach, application process – if any, Utility-coordination, customer scheduling, etc.)
 - b. Program “data capture” (i.e. participating customers, measures implemented, savings, etc.)
 - c. Quality Assurance inspections of installed program measures; including percentage of participants;
 - d. Data management and reporting, including timing/periodicity and format (e.g. hard copy, electronic (spreadsheets, database, e-mail, web-based ...))
6. Schedule/timing of deployment and implementation of Program, after selection and award is made, including forecast of energy savings and peak demand achieved by month through December 2017 (at a minimum).
7. Cost of program, across all size range estimates, broken down by unit measure (¢/kWh , $\text{\$/BTU}$ and $\text{\$/kW}$). These data should be presented for installed program costs as well the lifecycle cost of program (i.e., installed costs divided by the Expected Useful Life of Measures/Program)
