

SOUTHERN CALIFORNIA PUBLIC POWER AUTHORITY

Request for Proposals for Market Research Services

Issuance Date: October 22, 2018

Response Deadline: November 22, 2018

I. Introduction

The Southern California Public Power Authority (SCPPA), on behalf of its Member Utilities, is hereby soliciting competitive proposals for Market Research Services, as described below in Section III.

SCPPA is interested in discovering all Respondent's capabilities related to specified Areas of Interest and associated pricing to enable informed decisions and potentially proceed to more specific negotiations on contract development with one or more qualified Respondents to this Request for Proposals (RFP).

Responses to this RFP are due on or before 4:00PM PST on November 22, 2018, as described below in Sections III and V.

II. Background

SCPPA is a joint powers authority and a public entity organized under the California Joint Exercise of Power Act found in Chapter 5 of Division 7 of Title 1 of the Government Code of the State of California, and through the SCPPA Joint Powers Agreement, for the purposes of planning, financing, developing, acquiring, constructing, operating and maintaining projects for the generation or transmission of electric energy. SCPPA also facilitates joint service contracts, at the request of its members, to aggregate like project efforts among its Members for the purposes of developing energy efficiency, demand response and resource procurement Programs or Projects to improve operating efficiencies and reduce costs.

Membership of SCPPA consists of eleven cities and one irrigation district, which supply electric energy within Southern California, including the municipal utilities of the cities of Anaheim, Azusa, Banning, Burbank, Cerritos, Colton, Glendale, Los Angeles, Pasadena, Riverside, and Vernon, and the Imperial Irrigation District. SCPPA is governed by its Board of Directors, which consists of representatives from each of its Members. The management of SCPPA is under the direction of an Executive Director who is appointed by the Board.

Any service contract subsequently entered into by SCPPA pursuant to this RFP would be utilized directly by the interested Members to serve their respective utility customers' needs. The service and work products would be ordered and approved directly by SCPPA and/or the applicable Members and the billing would be administered through SCPPA.

III. Areas of Interest

Certain SCPPA Members have expressed interest in acquiring professional market research services to meet the needs of their municipalities by assessing their customers’ level of satisfaction with the utility services the Member provides including but not limited to:

- Operational performance (service reliability...);
- Resource mix (renewable resource development...);
- Traditional program offerings (efficiency rebates/incentives...); and
- Advanced technology implementation (Smart Grid, Energy Storage...)
- Customer Preference monitoring and evaluation (internet penetration, notification tools, emerging technologies....,

In addition to the development of a comprehensive set of market research questions that may be necessary to acquire valid and valuable insights on customer satisfaction related to the exemplary areas identified above, Members are also interested in acquiring professional consulting services in helping develop utility-specific action plans and strategies to address, improve, and/or correct any problems or areas of dissatisfaction identified in the market research referenced directly above. Such plans and/or strategies could include, but would not be limited to:

- Revised policies on operational practices;
- New guidelines for resource procurement;
- Updated/Improved Programs;
- Integration strategies to provide new, non-traditional technologies to customers cost-effectively.

To achieve these concomitant goals, SCPPA is seeking proposals from qualified firms who can demonstrate their expertise in providing such services, including experience with utilities who provide more than one service to customers (e.g. electric and water). In addition, all responses should include sufficient specification to allow SCPPA and Members to understand the processes/practices that will be employed to:

- Develop the questions;
- Gather the market research information/data;
- Synthesize this information to provide all necessary reports on the results; and
- Translate the results in actionable plans and strategies to address, improve and/or correct problems or issues identified by the market research.
